# New logo

This year we are glad to introduce our restyled Gymnic logo. This originally appeared on the first “Gymnic Ball” in 1990, becoming a distinctive image of our company and our complete range of products for more than 30 years. Considering the great importance of the Gymnic brand icon, we realized this makeover to convey the most representative qualities of our business ever since: new energy, passion and innovation. The new logo design is part of a renovation process concerning the packaging and all our marketing supports.

## Why is Rody so special?

- - **Improves motor skills.** The Rody horse gives children playtime fun while building muscle and improving little one's motor skills. Bouncing strengthens the leg muscles, while improving arm and grip function as the child holds onto Rody's ears. Core strength builds as the rider moves to balance.
- - **Unique design.** The rounded shape, designed by a merging of spheres, ensures ultimate bounce and safety. Its unique design results in the center being contoured, allowing a naturally balanced and comfortable seat for the rider. Furthermore, the rounded design together with its smiling expression make it a lovable character which has an immediate appeal to children.
- - **Material safety and superior bouncing performance.** The material used, compliant with the most stringent European and US chemical regulations, is a perfect combination of strength, softness and elasticity in order to provide the best riding experience ever.
- - **Versatile like no one.** Thanks to the removable bases (Rocking Base and Speedy Base) you can transform your Rody either in a rocking horse or in a wheeled ride-on toy. In this way, you can increase its functions and extend the possibilities of use.
